PLASTIC CAGES

Shor-Line provides plastic cages as a housing option. These cages are lightweight but durable and a good alternative for grooming housing.

Benefits:
The plastic cages are corrosion-resistant and constructed of technologically advanced materials for durability and sanitation. More durable and serviceable than fiberglass or wood/laminate dog cages. Our plastic cages are made of molded polyethylene in one piece. It is slightly tapered (see photo) so the front dimensions on medium cages are 24¼"W x 28-3/8"H x 28-3/8"D but the inside front is 21½"W x 25"H and the back dimensions would be 20"W x 23"H.

These cages are available in a 4’ or 6’ assembly, and the 4’ assembly has either two large cages or a large cage on the bottom with two small cages on the top. All are available with optional floors and pans that make clean-up easy. The large cages have an optional cage divider.

Features:
- One piece, rotationally molded polyethylene eliminates stress points and adds overall uniformity and rigidity.
- Plastic material resists stains, daily exposure to disinfectants, and makes clean up a snap.
- This product comes with a PVC coated raised floor that fits into the bottom of the cage above a high impact polystyrene pan. The pan slides out easily for cleaning.
- Urine retaining lip catches spills.
- Stainless steel doors and hardware.
- Large cage: 48½"W x 34½"H x 28-3/8"D but the inside front is 46"W x 30¼"H and the back dimensions would be 44½"W x 29"
