

KAT PORTAL

An economical solution to transform two Stainless Steel cages into a spacious Cat Suite!

Kat Portal

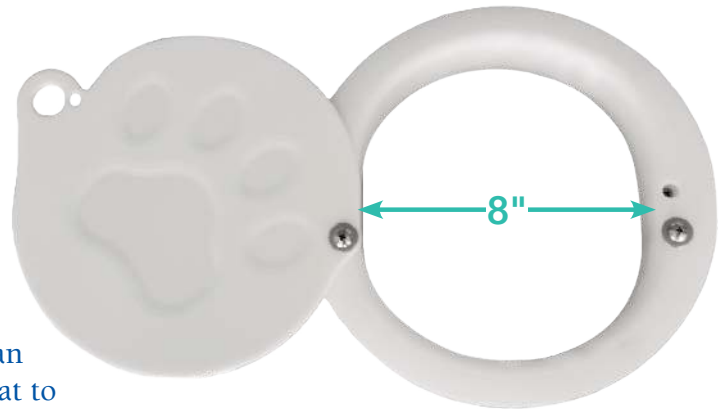

Benefits:

The Kat Portal transforms any two Shor-Line cages into an expansive home for felines. The larger space allows the cat to roam as they please, and the portal closes off when you need to clean or use the extra space.

As found by research conducted by the University of California Davis, the Kat Portal decreases feline housing stress. This in turn decreases the risk of disease and increases cat adoptability in shelters.

Features:

- The Kat Portal creates an 8"-diameter opening with a 9.5" lip that creates a stylish, finished edge.
- PVC spacer included in the kit protects the cage integrity to maintain cage strength.
- The paw print on the ABS latch closes down to secure the opening with a latch pin. This gives you added flexibility when you need the unit to operate as two individual cages.
- To help you protect your existing cages, we require one template, which can be used for multiple installations.
