A guide for:
Shor-Line Surgery Tables,
Next Generation

⚠️WARNING ⚠️ This product is for animal use only. We do not condone this product for other uses.

⚠️WARNING ⚠️ To reduce the risk of injury, the user must read and understand this guide before installation of this product.
Introduction

Thank you for purchasing Shor-Line products. As a leader in animal care equipment, our commitment to you is exactly the same as it was in 1927.

We hope this guide answers any questions you might have in regards to use, care or installation. If you can’t find the answers to your questions, have further questions or would like to purchase additional products, please contact us at 800.444.1579 or 913.281.1500. If in Europe phone +44 1446 77 20 41.

Consider keeping this guide in a safe and convenient place for future assistance.

**IMPORTANT:** DO NOT ATTEMPT TO DISASSEMBLE TABLE WITHOUT CONTACTING SHOR-LINE.

For your safety, please follow the instructions on these labels:

Section 1: Unpacking & Inspecting Shipment

Unpacking & Inspecting Steps

Your Surgery Table is shipped in two cartons and should be carefully examined upon arrival for possible damage in shipment. If any damage is found, notify Shor-Line immediately.

Step 1
Locate the Packing Slip that describes the parts and quantities shipped.

Step 2
Review Section 12: Shor-Line’s Warranty Information. For more information visit: www.shor-line.com/warranty. Then click the Damages/Returns/Repairs link on the left.

Step 3
Be sure that all parts are contained for your Surgery Table.

Step 4
Check content for concealed damage.

*If Concealed Damage:*
Follow instructions within Section 6: Shor-Line’s Warranty Information. For more information visit: www.shor-line.com/warranty. Then click the Damages/Returns/Repairs link on the left.

Call Shor-Line immediately so we can expedite replacements or repairs.

**IMPORTANT:** After fifteen (15) calendar days of receipt of merchandise, this policy becomes void.

Section 2: Safety, Grounding Instructions and Features

Safety and Grounding Instructions

When using electrical equipment, basic safety precautions must be followed, including:

- Read all instructions before using this equipment. Improper installation could cause product malfunction.
- This equipment must be grounded. Connect only to properly grounded outlet. See Grounding Instructions and Installation below.
- Install or locate this equipment only in accordance with the provided installation instructions.
- Use this equipment only for its intended use as described in this guide.
- This equipment should not be used by children.
- Do not operate this equipment if it has a damaged cord or plug, if it is not working properly, or if it has been damaged in any manner.
- Do not cover or block any opening on the equipment.
- Do not use outdoors.
- Do not immerse cord, plug or equipment in water.
- Do not let cord hang over edge of table or counter.
- Turn equipment off at switch before unplugging from wall outlet.
- When unplugging equipment, grip plug, not cord.
- Contact Shor-Line for examinations, repairs or adjustments.

Grounding Instructions & Installation

This equipment must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This equipment is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

**WARNING**
Improper use of the grounding plug can result in risk of electric shock.

Consult a qualified electrician or service person if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded.

For personal safety, this equipment must be properly grounded by being plugged directly into a 120 Volt, 50/60 Hz, or 240 Volt, 50/60 Hz (United Kingdom and Europe only), grounded polarized three prong outlet (see voltage label on product). DO NOT, under any circumstances, cut or remove the third (round) prong from the power cord (Fig. 2A).

The use of an extension cord, even a heavy duty cord, is not recommended because of potential safety hazards.

Where a standard two-prong wall receptacle is encountered, it is the personal responsibility and obligation of the consumer to have it replaced with a properly grounded and polarized wall receptacle in accordance with the National Electrical Code.

Where local codes permit, a TEMPORARY CONNECTION may be made to a properly grounded two-prong wall receptacle by the use of an adapter which is available at most local hardware stores (Fig. 2B).

Attaching the adapter ground terminal to the cover screw of the electric outlet, does not ground the equipment unless the cover screw is grounded through the building wiring. If there is any doubt whether the wall receptacle is properly grounded, have it checked by a qualified electrician.
### Features - Next Generation Surgery Table, Hydraulic, Rotational

Features - Next Generation Heated Surgery Table Tops

V-TOP HEATED TABLE TOP
P/N 803.4101.05 (120V)  
P/N 803.4101.06 (240V)

- All the same great benefits of our V-Top Surgery Table Top Plus
- Each V-Top panel contains a 8 1/4" X 44" heated area with an overall heated area of 161/2"W X 44"L.
- The table top takes approximately 15 minutes to warm up and maintains a factory set temperature of 95°F (35°C) + or - 1°F with a set over temperature of 105°F (40.5°C) + or - 1°F with automatic shut off.
- The controller is mounted to the table top for easy monitoring and offers three Time Cycle setting options: 60, 90 and 120 minutes.
- A Stand By mode is set to sound an alarm at 5 minutes and continues to the end of the selected Time Cycle, followed by a repetitive series of low tone beeps to warn of the time coming to an end.
- In case the unit becomes unplugged or the temperature exceeds the safety shut-down limit, the Alert Mode will sound bringing it to the attention by both sound and a red light and will automatically shut down.
- The power cord is 10' long. Electrical: 120/240 VAC, 50/60 Hz. 1.8A at 120 VAC.

FLAT TOP HEATED TABLE TOP
P/N 803.4001.04 (120V)

- All the same great benefits of our Flat Top Surgery Table Top Plus
- The table contains a heated area of 15 1/2"W X 46"L.
- The table top takes approximately 15 minutes to warm up and maintains a factory set temperature of 95°F (35°C) + or - 1°F with a set over temperature of 105°F (40.5°C) + or - 1°F with automatic shut off.
- The controller is mounted to the table top for easy monitoring and offers three Time Cycle setting options: 60, 90 and 120 minutes.
- A Stand By mode is set to sound an alarm at 5 minutes and continues to the end of the selected Time Cycle, followed by a repetitive series of low tone beeps to warn of the time coming to an end.
- In case the unit becomes unplugged or the temperature exceeds the safety shut-down limit, the Alert Mode will sound bringing it to the attention by both sound and a red light and will automatically shut down.
- The power cord is 10' long. Electrical: 120/240 VAC, 50/60 Hz. 1.8A at 120 VAC.

NOTE: The Preset Heated Tops are not available with the Pedestal Base.
Optional: See page 7 for a list of all options available for the Flat Top and V-Top Surgery Tables.

Features - Next Generation Surgery Tables, Feline

HYDRAULIC  P/N 903.4000.05

- 20"W X 44.5"L Flat Top.
- An attachment rail system runs continually along the sides of the table. Two sliding, quick-release, cam cleat tie-down attachments are provided for each side of the attachment rail.
- Top features drain outlet.
- The table has a tilt mechanism that allows the table to tilt 30 degrees with a locking mechanism that is infinite up to the 30 degrees.
- Top rotates 360 degrees.
- Table can be lifted from 20" to 39¾" via hydraulic mechanism.

PEDESTAL  P/N 903.4010.03

- 20"W X 44.5"L Pedestal.
- An attachment rail system runs continually along the sides of the table. Two sliding, quick-release, cam cleat tie-down attachments are provided for each side of the attachment rail.
- Top features drain outlet.
- The table has a tilt mechanism that allows the table to tilt 30 degrees with a locking mechanism that is infinite up to the 30 degrees.
- Top rotates 360 degrees.
- Table stands 35 1/2" tall.
- The solid base with stainless steel cover measures 21 1/4"W X 17 3/4"L.
Section 3: Installation

Installing the Surgery Table Bases

⚠️ CAUTION The Surgery Tables are heavy. Precautions must be taken. Utilize two or more people when installing.

The Next Generation Surgery Tables are shipped in separate cartons and do require some assembly. We offer four base options and four table top options (V-Top, Flat-Top, Heated or Feline). This allows the customer to choose the Table Assembly that works best for them. In addition, all four bases have the same hole pattern for mounting the table tops. Therefore the installation procedures will not differ. However, each of these will have operational/ functionality differences and will be covered in detail later in this guide.

When determining where to place your Surgery Table within your facility consider the following:

• The Basic Flat Top and V-Top Surgery Tables are stationary with a solid stainless steel base measuring 21 ¼” W x 17 ¾” L.
• The Hydraulic Flat Top and V-Top Surgery Tables, rotating and non-rotating, has a hydraulic mechanism that allows the table to be placed anywhere as the unit has no cords and will not cause a tripping hazard.
• The Electric Flat Top and V-Top Surgery Tables, 120V and 240V, have an actuator system that requires the unit to be plugged into a power outlet. The unit has a 6 foot power cord.
• The Heated V-Tops, V-Top and Flat-Top are available in 120v and/or 240v. Both designs contain a heat control box with a 10 ft. power cord that must be plugged into the appropriate voltage power outlet before using.

**NOTE:** The Heated tops are not available for the pedestal base.
Step 1
Unpack the table base and place in the desired location in your facility. See Fig. 3A.

Step 2
Adjust the leveling screws on the bottom of the base until the table sits level. See Fig. 3B.

NOTE: All four base options have the same leveling feet and located in the same place.

IMPORTANT: Your surgery table must be level in order to function properly.
Section 4: Operation and Functionality: Surgery Table Bases

Hydraulic Base, Rotational

Mounting Holes - Four mounting holes located on top on the tilt mechanism to mount the table top.

Column Locking Handle - This is used to lock the column in place once you have made any/all adjustments. Before rotating, raising or lowering the table you must unlock the column by turning the handle counter clockwise. Rotate the table to the desired position (up to 360 degree). Turn the handle clockwise to lock table top in place.

IMPORTANT: The Column Locking Handle should be kept in the locked position except when adjusting table.

Tilt Locking Handle - The table can be tilted up to 30 degrees and locked in that position using the Tilt Locking Handle. Turn the handle counter clockwise to loosen. Tilt table to desired position. Turn handle clockwise to lock into place.

IMPORTANT: The drain tube on the underside of the table top should always be at the lower end in all positions.

Hydraulic Foot Pedal - The unit has a hydraulic mechanism with a total lift of about 10 inches using the Hydraulic Foot Pedal. To raise table, unlock the column by turning the Column Locking Handle counter clockwise. Pump the foot pedal until the table is in the desired position. Turn the Column Locking Handle clockwise to lock into place.

Hydraulic Release Pedal - Used to lower the table to the desired level. To lower table, unlock the column by turning the Column Locking Handle counter clockwise. Lower the table by pressing the Hydraulic Foot Pedal to the floor while pressing the Hydraulic Release Pedal with your toe. Turn the Column Locking Handle clockwise to lock into place.

Hydraulic Base, Non-Rotational

Mounting Holes - Four mounting holes located on top on the tilt mechanism to mount the table top.

Tilt Locking Handle - The table can be tilted up to 30 degrees and locked in that position using the Tilt Locking Handle. Turn the handle counter clockwise to loosen. Tilt table to desired position. Turn handle clockwise to lock into place.

IMPORTANT: The drain tube on the underside of the table top should always be at the lower end in all positions.

Hydraulic Foot Pedal - The unit has a hydraulic mechanism with a total lift of about 10 inches using the Hydraulic Foot Pedal. To raise the Table, pump the Hydraulic Foot Pedal until the table is in the desired position.

Hydraulic Release Pedal - Used to lower the table to the desired level. Lower the table by pressing the Hydraulic Foot Pedal to the floor while pressing the Hydraulic Release Pedal with your toe.
The Basic (Pedestal) Base is a solid stationary base with stainless steel cover that is intended to be placed in a location within the facility and not moved.

**Mounting Holes** - Four mounting holes located on top on the tilt mechanism to mount the table top.

**Tilt Locking Handle** - The table can be tilted up to 30 degrees and locked in that position using the Tilt Locking Handle. Turn the handle counter clockwise to loosen. Tilt table to desired position. Turn handle clockwise to lock into place.

**IMPORTANT:** The drain tube on the underside of the table top should always be at the lower end in all positions.

---

**Electric Base**

**Mounting Holes** - Four mounting holes located on top on the tilt mechanism to mount the table top.

**Column Locking Handle** - This is used to lock the column in place once you have made any/all adjustments. Before rotating, raising or lowering the table you must unlock the column by turning the handle counter clockwise. Rotate the table to the desired position (up to 360 degree). Turn the handle clockwise to lock table top in place.

**IMPORTANT:** The Column Locking Handle should be kept in the locked position except when adjusting table.

**Tilt Locking Handle** - The table can be tilted up to 30 degrees and locked in that position using the Tilt Locking Handle. Turn the handle counter clockwise to loosen. Tilt table to desired position. Turn handle clockwise to lock into place.

**IMPORTANT:** The drain tube on the underside of the table top should always be at the lower end in all positions.

**Note:** The Electric Base is available in 120V or 240V, The table is equipped with a six foot power cord which must be plugged into the appropriate voltage power outlet before using. The Foot Pedal engages a quiet actuator capable of lifting 200 lbs.

**Foot Pedal** - To raise the table, turn the Column Locking Handle counter clockwise to unlock column. Press down on the up arrow indicator on the top of the foot switch until the table is at the desired height. To lower, press down on the down arrow indicator until the table has been lowered to the desired height. Turn the Column Locking Handle clockwise to lock into place.

**Note:** Electric Bases are not available in non-rotational.
Section 5: Installing the V-Top Surgery Table Top

Installing the Table Top

The Surgery Table bases were designed using the same tilt assembly. Therefore, the installation procedures for the V-Top Table Top will be the same for each base.

**CAUTION** The V-Top Surgery Table is heavy so precautions must be taken. Use two or more people when unpacking your shipment.

**EQUIPMENT/PARTS:**
Included in the V-Top Table Top shipping carton is a plastic bag containing (4) flat washers, (4) lock washers, (4) nylon washers and (4) hex nuts to mount the top to the base. In addition to the mounting hardware, (4) cam cleat assemblies are included.

**TOOLS REQUIRED:**
9/16 Socket or Crescent Wrench

**Step 1**
Ensure the tilt mechanism is in the horizontal position and locked.

**Step 2**
Ensure the Column Locking Handle on the Hydraulic and Electric bases are in the locked position.

**NOTE:** Non-Rotational and Basic bases will not have a column locking handle.

**Step 3**
Place one of the nylon washers on each of the mounting studs. See Fig. 5B.

**Step 4**
Place the table top with nylon washers on the tilt mechanism, on the top of the base assembly, and align the four mounting studs with the holes in the tilt mechanism.

See Fig. 5B.

**Step 5**
Once the mounting studs, with nylon washers, have been placed in the mounting holes, the table top can be secured using the additional hardware. The hardware should be installed in the following order:
1) Flat washer placed over stud
2) Lock washer placed on top of flat washer
3) Hex nut placed on top of lock washer

**Step 6**
Tighten using a 9/16 socket or crescent wrench.

**NOTE:** The hardware must be placed on all (4) studs and must be tight in order for the table to function properly.
Installing Cam Cleats on the V-Top

The V-Top Surgery Table comes equipped with a rail system which extends down the outer sides of the table. Also provided with the table are four cam cleat tie down attachments that can be used to secure the patient during surgery. See Fig. 5C.

Step 1
The cam cleats can be installed two ways:

1. Loosen the knob by turning counter clockwise to remove the screw enough to allow you to place the slide block onto the end of the rail attachment bar and slide it along the rail system to the desired position. Then turn the knob clockwise to tighten and secure the cam cleat in the desired position.

   or

2. Loosen the knob by turning counter clockwise to remove the screw enough to allow you to place the slide block on the side of the attachment rail in the desired position. Then turn the knob clockwise to tighten and secure the cam cleat in place.

Step 2
Once the cam cleat assembly has been secured to the attachment rail, the patient can be secured by placing the leash or strap between the two cleats on the outside of the assembly. If pulled through, the cleats will lock to secure the leash/strap. The cam cleats have a maximum work load of 120 kg/264 lbs. See Fig. 5D.

To release, simply pull the leash outwards.
Adjusting V-Top Table Panels

The V-Top design allows the panels to be raised or lowered to hold the patient in the desired position during surgery. Once procedure is over, the panels can be opened 270 degrees for easy access to the drain trough for removal of surgical waste.

Step 1
To raise or lower the panels, turn the locking knobs counterclockwise until loose.

Step 2
Raise the panel to the desired height.

Step 3
Turn the locking knob clockwise to tighten.

Step 4
Repeat steps 1-3 for other side.

NOTE: The V-Top has a locking knob for each panel on each end of the table. However, only one knob per panel needs to be loosened to adjust the panel.
Cleaning V-Top Panels

The V-Top design allows the panels to open to 270 degrees for easy access to the trough for removal of surgical waste.

**Step 1**
Using the Locking Knobs, adjust both of the V-Top panels to the maximum angle. Pull outward at center of panels to rotate panels downward. This will expose the underside of the panels, clean thoroughly.

**Step 2**
Remove the drain trough located under the panels and clean thoroughly.

**Step 3**
Replace the drain trough and adjust the panels to the desired location. Refer to page 20, Adjusting V-Top Table Panels.

**NOTE:** The drain pail can be removed/cleaned without adjusting the panels or removing the trough by simply removing the pail from the collection pail hook on the underside of the table.

**NOTE:** For additional cleaning information for the V-Top and Flat Top Surgery Tables, please see Care and Cleaning Best Practices and Protecting Against Disease and Infection, Section 11.
Section 6: Installing the Flat-Top Surgery Table Top

Installing the Table Top

The Surgery Table bases were designed using the same tilt assembly. Therefore, the installation procedures for the Flat-Top Table Top will be the same for each base.

**CAUTION** The Flat-Top Surgery Tables are heavy so precautions must be taken. Use two or more people when unpacking your shipment.

**EQUIPMENT/PARTS:** The Flat-Top Surgery Table top and base are shipped in separate cartons and does require some assembly. Included in the table top shipping carton is a plastic bag containing 4 flat washers, 4 lock washers and 4 hex bolts needed to mount the top to the base. In addition to the mounting hardware we have included 4 cam cleat assemblies.

**TOOLS REQUIRED:**
9/16 Socket or Crescent Wrench

**Step 1**
Ensure the tilt mechanism is in horizontal position and locked.

**Step 2**
Ensure the Column Locking Handle on the Hydraulic and Electric bases are in the locked position.

**NOTE:** Non-Rotational and Basic bases will not have a column locking handle.

**Step 3**
Place the table top on the tilt mechanism and align the four holes in the in the bottom of the table top frame with the four holes in the tilt mechanism.

**Step 4**
Once the table mounting holes have been lined up with the tilt mounting holes, the table top can be secured using the hardware supplied. The hardware should be installed in the following order.
a). Flat washer  
b.) Lock washer placed on top of flat washer.  
c.) Hex bolt placed through both the flat washer and lock washer and inserted through the tilt and into the table top.

**Step 5**
Tighten using a 9/16 socket or crescent wrench. See Fig. 6B.

**Note:** The hardware must be placed in all (4) holes and the bolts must be tight for the table to function properly.
Installing Cam Cleats on the Flat-Top

The Flat-Top Surgery Table comes equipped with a rail system which extends down the outer sides of the table. Also provided with the table are four cam cleat tie down attachments that can be used to secure the patient during surgery. See Fig. 6C.

**Step 1**
Loosen the knob by turning counter clockwise to remove the screw enough to allow you to place the slide block on the side of the attachment rail in the desired position. Then turn the knob clockwise to tighten and secure the cam cleat in place.

**Step 2**
Once the cam cleat assembly has been secured to the attachment rail, the patient can be secured by placing the leash or strap between the two cleats on the outside of the assembly. If pulled through, the cleats will lock to secure the leash/strap. The cam cleats have a maximum work load of 120 kg/264 lbs. See Fig. 6D.

To release, simply pull the leash outwards.
Section 7: Installing the Feline Surgery Table Top

Installing the Table Top

The Feline Surgery Table bases were designed using the same tilt assembly. Therefore, the installation procedures for the Feline Table Top will be the same for both bases.

**CAUTION** The Feline Surgery Tables are heavy so precautions must be taken. Use two or more people when unpacking your shipment.

**EQUIPMENT/PARTS:** The Feline Surgery Table top and base are shipped in separate cartons and does require some assembly. Included in the table top shipping carton is a plastic bag containing 4 flat washers, 4 lock washers and 4 Truss Head Screws needed to mount the top to the base. In addition to the mounting hardware we have included 4 cam cleat assemblies.

**TOOLS REQUIRED:**
Phillips Screwdriver

**Step 1**
Ensure the tilt mechanism is in horizontal position and locked.

**Step 2**
Ensure the Column Locking Handle on the Hydraulic base is in the locked position.

**NOTE:** The Basic pedestal base will not have a column locking handle.

**Step 3**
Place the table top on the tilt mechanism and align the four holes in the bottom of the table frame with the four holes in the tilt mechanism. See Fig. 7A.

**Step 4**
Once the table mounting holes have been lined up with the tilt mounting holes, the table top can be secured using the hardware supplied. The hardware should go through the tilt and into the table top in the following order:
- a). Flat washer
- b). Lock washer placed on top of flat washer
- c). Truss head screw placed through both of them through the tilt assembly and into the table top.

**Step 5**
Tighten using a Phillips head screwdrivers. See Fig. 7B.

**NOTE:** The hardware must be placed in all (4) holes and the bolts must be tight for the table to function properly.
Installing Cam Cleats on the Feline Table Top

The Feline Table Surgery Table Top comes equipped with a rail system which extends down the outer sides of the table. Also provided with the table are four cam cleat tie down attachments that can be used to secure the patient during surgery. See Fig. 7C.

**Step 1**
Loosen the knob by turning counter clockwise to remove the screw enough to allow you to place the slide block on the side of the attachment rail in the desired position. Then turn the knob clockwise to tighten and secure the cam cleat in place.

**Step 2**
Once the cam cleat assembly has been secured to the attachment rail, the patient can be secured by placing the leash or strap between the two cleats on the outside of the assembly. If pulled through, the cleats will lock to secure the leash/strap. The cam cleats have a maximum work load of 120 kg/264 lbs. See Fig. 7D.

To release, simply pull the leash outwards.
Shor-Line Heated Table Tops provide a warm, temperature-controlled surface that helps prevent hypothermia during small animal surgeries. The Heated Tops are available in both the V-Top and Flat Top design and can be purchased in 120V or 240V. The Heated Table Tops have all the great features of our standard surgery table tops plus additional heated benefits which are detailed in Section 2, page 13. As with our standard tops, the Heated Tops have the same hole pattern used to mount the tops to the bases (outlined in Section 3) and will be mounted using the same procedures.

**NOTE:** For V-Top, refer to Section 5. For Flat-Top, refer to Section 6.

Our Heated Tops come fully assembled and ready to mount on your table base. Once your table top has been mounted, we strongly suggest you read this section in its entirety before you begin using your table.

### Important Dos and Don’ts

Due to the sensitivity of exposed tissue, it is recommended that a sterile pad or towel be places between the table and the Heated Top whenever you are placing an animal with an open wound or exposed sutured tissue on the heated table.

Do not leave large, aggressive animals unattended on the Heated Table, as the heated cable could be damaged.

Do not permit access to the Heat Control power cord by any animal.

Do not immerse the Heat Control in water. This could result in electric shock.

**Do not plug power cord into outlet until cables have been connected.**
Table Top Warm Zone

The Heated Table Tops have a warm zone covering the area as shown in the diagrams below.

The animal should be placed near the center of the Heated Table Top.
Cable Connections

The heating elements installed in the table tops have a bulk head connector attached to the end of a cable which are then attached to the bulk head connectors installed in the Heat Control boxes. These are attached in the factory prior to shipment, but you may be required to detach and reinstall. If not done properly, your table top could be damaged. Improper cable connection could void your warranty. Please review the following before disconnecting your Heat Control.

The V-Top Table is equipped with a heating element installed in each panel. Each heating element contains a cable that is connected to the Control Box.

![HEAT CONTROL BOX, V-TOP TABLE](image)

**Step 1**
Line up the Key and the Key Way.

**NOTICE:** If Key and Key Way are not aligned, the pins may bend, making the unit inoperable.

**Step 2**
Gently push the two ends together.

**NOTE:** Do not force connection. If connectors are aligned, cable will slip into place.

**Step 3**
Turn the nut clockwise to secure the connection.

**NOTE:** Do not secure until cable is in place, as this could damage pins.

**IMPORTANT:** Do not bend the pins in the connector. This will cause the product to malfunction.

![Fig. 8B](image)
Section 9: Heat Control Box Functions

The Heat Control Boxes operate and look exactly the same, except the V-Top has two bulk head connectors since the V-Top contains a heating element for each panel whereas the Flat-Top Table has only one.

- **Power Button**: Provides power to the Heat Control Box and selects the time cycle simply by the number of times pressed.
  - Press once: Will set the time for 60 minutes and the light above ‘60 min’ on the control box will illuminate green.
  - Press twice: Will set the time for 90 minutes and the light above ‘90 min’ on the control box will illuminate green.
  - Press three times: Will set the time for 120 minutes and the light above ‘120 min’ on the control box will illuminate green.
  - Press four times: Will turn the controller off.

- **Stand By**: During the last five minutes in any of the three available time cycles the following will occur: For 4 minutes the Stand By light will illuminate a solid yellow and a single beep will occur every 30 seconds for a total of 8 beeps. For the last minute of any time cycle the Stand By light will illuminate a flashing yellow and a double beep will occur every 10 seconds.

- **Alert**: The Heat Control Box is factory set at 95°F (35°C) with an over temperature protection of 105°F (40.5°C). If for any reason the pad reaches a temperature of 105°F (40.5°C), the heater will be disabled, the alert light will illuminate red and flash continuously and a triple beep will occur. This condition will remain until the pad lowers in temperature or the unit is turned off by pressing the Power Button.

- **NOTE**: The Heat Control Box is factory set to reach a temperature of 93°F (33.8°C) which takes approximately 15 minutes. Turning the unit off does not immediately reduce the temperature. Should the alert condition occur the patient should be removed from the Warming Pad as soon as possible to prevent possible burns.

Electrical Rating: 120/240 VAC, 50/60 HZ, 1.8 at 120 VAC, .9 at 240 VAC

Important: This warming system functions best with an operating room ambient temperature between 68°F and 72°F (20°C and 22°C). As the room temperature increases, so does the warming system temperature. The system may go into Alert and shut down if the ambient temperature is 85°F (29°C) or higher.
Section 10: Maintenance and Cleaning

**IMPORTANT:** Do NOT immerse the Heat Control in water or spray the controller box with water, cleaners, sanitizer or disinfectants.

To clean the controller box:

**Step 1**
Unplug power cord.

**Step 2**
Disconnect the Table Top from the controller by unscrewing the cable from the bulk head connector counter clockwise.

**Step 3**
The control box can then be wiped using a soft cloth dampened with sanitizer or disinfectant.
Section 11: Stainless Steel Care & Cleaning

Quality & Life of Your Product

**IMPORTANT:** Routine maintenance will ensure quality and life of your long-term investment and protect animals from transmittable disease and infection

**IMPORTANT:** To safeguard your investment and rights to the Shor-Line’s Warranty, it is important that you know factors that degrade stainless steel. Corrosion, pitting, and discoloration can occur if:

- Bleach, deodorizing agents, disinfectants, and sanitizers (chlorides, bromides, iodides and thiocyanates) stand wet on your product for a prolonged period (over two minutes).
- Bleach, deodorizing agents, disinfectants, and sanitizers are used frequently without being neutralized with clean water after each application.
- Acidic urine is not removed rapidly and surfaces are not washed thoroughly.
- Animal hair, holding urine and fluids, is allowed to collect around legs, hinges, casters, and welded wire intersections.
- Solutions like liquid bleach and antibacterials are allowed to evaporate and dry on surfaces.
- Particles from steel wool, metal fiber brushes, or metal scrapers (which are never recommended for cleaning stainless) get embedded in your product’s surface, rust, and give the false impression that the stainless steel is defective.
- Your water source (local or well) is heavy in iron content and water is allowed to dry on your product.
- High levels of pollution (automotive exhaust, aggressive gases, soot, iron oxides, chemicals, etc.) or chloride (from sea or de-icing salts) exist in the environment and frequent, thorough cleaning (manual or rain-washing) does not occur.

Care & Cleaning Best Practices

**IMPORTANT:** You play an essential role in safeguarding your investment and rights to Shor-Line’s Warranty. We strongly recommend:

- Daily or weekly cleaning of stainless steel to prolong its longevity and value and to help you maintain its finish.
- Using the mildest cleaning procedure that will do the job effectively.
  - Ordinary waste deposits and fluids can usually be removed with soap and water. Rinse thoroughly with clear water and dry completely with a soft cloth to discourage water spotting.
  - Minor scale build up and some hard water spotting can be removed by washing with vinegar followed by a clearwater rinse and thorough drying.
  - If rubbing, brushing, or scraping is required, use only stainless steel wool, brushes with plastic, nylon or stainless steel fibers, and scrubbers made of plastic or nylon. Ordinary steel wool or steel brushes should never be used.
  - Stubborn deposits or tightly adhering debris may require a commercial cleaning product. Scouring powders will scratch stainless and should not be used. Always review label statements on cleaning products regarding use on metals.
  - Cleaning is not completed until fresh water has been used to thoroughly rinse all residue of salt, bleach, deodorizing agents, disinfectants, and sanitizers.
- Rubbing, drying, and polishing should always be in the direction of the product’s grain so scratches will blend into the surface. Efforts opposite the grain may produce a scratched surface appearance.
- Rubbing a soft cloth moistened with olive oil, undiluted white or cider vinegar, or club soda may brighten stainless steel and help remove surface streaks and heat stains.
- Never use paint, lacquer, or varnish as a substitute or shortcut for properly caring and cleaning stainless steel.
- Never intentionally stamp or etch stainless surface.

Protecting Against Disease & Infection

**IMPORTANT:** Shor-Line shares your commitment to health and safety. This information is intended help protect your animals, as well as, safeguard your investment.

- Bleaches can be harmful to animals. Bleaches can react with acids and release chlorine gas that is highly toxic.
- Because of its strong corrosive and toxic properties, bleach is diluted with water. The solution’s potency (shelf-life) quickly degrades as the active chlorine dissipates with water. Animal care professionals, therefore, cannot know with certainty how effective the bleach solution is over time without implementing a formal monitoring system.
- If chemical deodorizers, disinfectants, or sanitizers are used, protect your animals from respiratory problems and infections by using clean water to wash residue from all surfaces and dry thoroughly.
- Clorox® Company warns: “We cannot recommend Clorox® to clean metal surfaces, including stainless steel. Prolonged or repeated exposure of metal to strong solutions of our product eventually can cause discoloration or corrosion. To reduce the possibility of metal discoloration, we suggest that exposure time to Clorox® be less than five minutes and that surfaces be rinsed well after application of the solution.”
Terms & Conditions

ORDER & ACCEPTANCE By submitting an order for the products described herein, Buyer shall have agreed to purchase the products subject to all Seller's terms including these TERMS and CONDITIONS. Buyer's order is subject to and effective only upon acceptance and approval at Seller's offices in Kansas City, Kansas as evidenced by Seller's issuance of an Order Acknowledgement or Invoice. Processing of an order shall not commence until receipt of any applicable deposit and all required paperwork and customer sign-offs. The resulting contract shall be deemed made in Kansas and shall in all respects be governed and interpreted according to the laws of the State of Kansas. Buyer also consents to the jurisdiction of Kansas courts over any dispute involving this order.

ENTIRE AGREEMENT This order as accepted and approved by Seller constitutes the entire final agreement between the parties. Except as otherwise provided in writing by Seller, the terms set forth herein constitute the sole TERMS AND CONDITIONS for Buyer's order. Seller's acceptance of Buyer's order is expressly conditioned on Buyer's assent to these TERMS AND CONDITIONS which may not be supplemented, modified, superseded or otherwise altered except as authorized in writing by Seller. Any different, conflicting or additional terms in Buyer's purchase order or any other document of Buyer are rejected and Seller's TERMS AND CONDITIONS shall prevail.

TERMS OF PAYMENT Unless otherwise expressly specified by Seller in writing, payment shall be due 30 days from the date of invoice, payable in U.S. Funds. Seller reserves the right to negotiate terms or orders of any unique or special nature and may require full or partial payment in advance in its sole discretion. Acceptance of all orders and the payment terms for such orders are subject to approval by Seller's Credit Department. Seller may decline to make any shipment or perform any work except upon terms satisfactory to said Department. A charge of 1½% per month (or the highest monthly interest rate that may be imposed under applicable law) will be imposed on overdue accounts. Buyer will be liable for all expenses (including reasonable attorneys' fees) incurred in collecting any overdue accounts.

PRICES & QUOTES Prices on products specified herein are F.O.B. Seller's factory unless otherwise specified in writing and are exclusive of any city, state, local or federal tax. Prices are subject to adjustment without notice and Seller reserves the right to correct errors in prices or specifications. Any quotation (whether written or oral) is not an offer to contract or acceptance of an order. Similarly, neither a price list nor a catalog constitutes an offer to sell or contract, but are provided solely for customers' convenience.

TAXES Any sales, use, property, or other taxes or duties which Seller may be required to pay or collect (under any existing or future law) in connection with the sale, purchase, delivery, storage, processing, consumption or use of the products purchased herewith shall be for the account of Buyer and Buyer shall promptly reimburse Seller therefore.

DELIVERIES Delivery dates are estimates only and time shall not be of the essence unless specifically provided by Seller in writing. Seller will not have any liability for loss or damage resulting from a delay in a scheduled delivery or for non-delivery resulting from labor trouble, part or material shortages, accident, fire, war, strike, natural disaster, carrier delays or any contingency whatsoever (whether of the same class of those enumerated or otherwise) beyond its reasonable control. Buyer assumes all freight, handling and installation costs and the risk of loss or delay in transit. Buyer will assist Seller with transit arrangements, but Seller shall be free of any liability in connection therewith. Title to all materials and products sold by Seller shall pass to Buyer upon delivery to the carrier and Seller's responsibility ceases at that time. Risk of loss, injury, or destruction of the products shall be borne by the Buyer and any such loss, injury or destruction shall not release Buyer from payment of the purchase price.

INSPECTION Buyer must inspect all materials for shortages, damages, conformity with order and defects before signing any documentation requested by the carrier. Buyer must immediately complete such inspection and shall not accept delivery of goods that are damaged or not in accordance with the bill of lading or packing slip without proper notification to the carrier and Seller. If goods are damaged, defective, shorted or appear not to conform to the order, Buyer shall discontinue their use and immediately notify the carrier and Seller of such condition and afford a reasonable opportunity to inspect the same. Buyer shall make, or provide Seller in writing with all information necessary to make, a claim against such carrier for any shortage, damage, or discrepancy of the shipment within fifteen (15) days after receipt of the goods. Claims or written information thereon not so presented within fifteen (15) days after receipt of the goods will not be allowed. No products will be taken back and credited or replaced unless arrangements for their return have been made in compliance with Seller's Return Policy stated below. SEE SELLER'S CATALOG FOR INFORMATION ON HOW TO FILE A FREIGHT CLAIM.
PRODUCT SATISFACTION

In the event Buyer is not fully satisfied with the quality or workmanship of a product purchased hereunder, Seller in its sole discretion may arrange either to credit Seller’s account (excluding shipping and handling costs) or replace the product. However, Buyer must notify Seller in writing of its dissatisfaction within fifteen (15) days of receipt of the product from Seller and immediately discontinue its use. Buyer also must return the rejected product to Seller freight paid within thirty (30) days of its receipt in compliance with Seller’s Return Policy stated below. Seller’s obligation is limited to providing the applicable credit or product replacement, which will be processed only after receipt of the returned product. In addition, this Product Satisfaction policy does not apply to specially designed, discontinued, used, factory second or repaired products.

LIMITED WARRANTY

Seller warrants to the initial purchaser only of products manufactured by it that such products are free from defects in materials or labor for varying periods depending on the particular product and subject to the limitations and conditions set forth herein. Seller’s stainless steel products are warranted to be free from such defects for their normal useful life. Seller’s mechanical and electrical products, parts, devices and components (including such parts, devices and components of stainless steel products), and other-non-stainless steel products are warranted to be free from such defects for only one year. Seller disclaims any express or implied warranty for products not manufactured by Seller and the only warranty available therefore to Buyer is that offered by the products’ manufacturers.

The warranty period shall run from the date of delivery to Buyer. If within the applicable warranty period a product proves to be defective as described herein, Seller will repair or replace the product, at Seller’s sole discretion, conditional upon Buyer’s written notice of the defect within fifteen (15) days after its discovery. Upon receipt of Buyer’s notice including substantiation of Buyer’s status as the initial purchaser and details of the defect, Seller shall advise Buyer whether it plans to repair or replace the product. Seller’s obligation is solely limited to repair or replacement of a defective product and in no event shall Seller be liable for transportation from or to Seller’s offices or any other expense which may arise in connection with this limited warranty or the aforementioned Product Satisfaction policy.

SELLER MAKES NO OTHER WARRANTY OR GUARANTEE OF ANY KIND WHATSOEVER, WHETHER EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE INCLUDING, BUT NOT LIMITED TO IMPLIED WARRANTIES OF FITNESS, AND/OR MERCHANTABILITY. THE ABOVE LIMITED WARRANTY CONSTITUTES SELLER’S ONLY WARRANTY AND NO PERSON OR ENTITY IS AUTHORIZED, ON BEHALF OF THE SELLER, TO MODIFY OR EXPAND UPON THE PROVISION EXPRESSED IN THIS PARAGRAPH NUMBER NINE. THE SELLER’S LIABILITY UNDER THIS LIMITED WARRANTY SHALL BE LIMITED AS PROVIDED FOR ABOVE AND THE FOREGOING SHALL BE THE BUYER’S SOLE REMEDY AND RECOUP UNDER THIS CONTRACT. There are no warranties which extend beyond the description on the face hereof and goods are sold as is. Seller’s Limited Warranty is only available to the initial purchaser of its products and is effective only upon compliance with the terms set forth herein.

Buyer agrees that the products subject to this Limited Warranty will be properly maintained in the ordinary course of business. Buyer agrees to comply with all instructions and specifications furnished by Seller relating to the installation, care, use and application of products purchased. Buyer agrees that it will not modify, misapply, or misuse such products in any manner which would deviate from Seller’s instructions. Any repairs, alterations or service provided by parties other than Seller, or its authorized representative, may void this Limited Warranty. This Limited Warranty shall not apply to normal wear and tear, improper or insufficient maintenance, routine maintenance, or damage caused by accident, negligence, improper operation or the use of corrosive materials (including without limitation bleach or sodium hypochlorite used on stainless steel surfaces). THE SELLER’S LIMITED WARRANTY MADE IN CONNECTION WITH THIS SALE SHALL NOT BE EFFECTIVE AND SHALL BE VOID UNLESS SUCH GOODS ARE APPLIED AND USED IN ACCORDANCE WITH SELLER’S INSTRUCTIONS.

LIMITATION OF LIABILITY

UNDER NO CIRCUMSTANCES SHALL SELLER BE LIABLE TO BUYER OR ANY OTHER PERSON FOR ANY SPECIAL, LIQUIDATED, INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING, WITHOUT LIMITATION, DAMAGES BASED UPON LOST GOODWILL, LOST SALES OR PROFITS, WORK STOPPAGE, DELAY, PRODUCT FAILURE, IMPAIRMENT OF GOODS OR OTHERWISE AND WHETHER ARISING OUT OF BREACH OF WARRANTY, BREACH OF CONTRACT, NEGLIGENCE OR OTHERWISE, and in any case, Seller’s liability for any and all losses and damages sustained by Buyer and others, rising out of or by reason of this contract, shall not exceed the original purchase price of the products upon which liability is founded.

IN NO EVENT SHALL ANY ACTION BE COMMENCED AGAINST THE SELLER MORE THAN ONE YEAR AFTER THE CAUSE OF ACTION WITH RESPECT TO WHICH THE CLAIM IS MADE HAS ACCRUED. SELLER SHALL
NOT BE RESPONSIBLE FOR EXPENSES FOR REPAIRS NOT MADE BY SELLER WITHOUT THE PRIOR WRITTEN CONSENT OF SELLER.

RETURN POLICY All products being returned for any reason or delivered for repair service (whether or not pursuant to our Limited Warranty) must receive advance authorization from Seller. Buyer must contact Seller’s Technical Service Department at 1.800.444.1579 to receive a Return Authorization Number. All products returned, except for warranty service or pursuant to the Product Satisfaction policy, are subject to a minimum 15% restocking charge. Buyer will be responsible for all freight charges on returns.

INDEMNITY Buyer agrees to protect, defend, indemnify and hold harmless the Seller from and against any and all direct loss suffered and any liability to third parties due to bodily injury (including death) to any person or animal, or damage to any property as a result of Buyer’s misuse, misapplication or failure to inspect or maintain the Seller’s products, or such loss or liability caused by the act or omission of the Buyer in the performance of any services using said products. Buyer also agrees to indemnify and hold harmless the Seller for any taxes paid as discussed in paragraph five above. This indemnity provision expressly includes attorney’s fees and settlements of claims in a reasonable manner under the circumstances.

UNLAWFUL USE Buyer agrees that no goods covered by this contract shall be used in any manner violative of any laws of the United States, whether state or federal, or local ordinance, and no such goods shall be distributed to any foreign country in any manner prohibited by United States law.

REGULATIONS AND CODES Seller makes no representation or promise, express or implied, that goods delivered hereunder will conform to any state or local laws, regulations, codes, ordinances, or standards, except as particularly and expressly specified and agreed upon for compliance in writing as a part of the contract between Buyer and Seller.

SELLER’S REMEDIES Seller hereby expressly reserves all remedies provided for by the Uniform Commercial Code and such remedies are expressly cumulative in nature and include all of the available remedies for breach and Seller need not make any election of remedy.

MISCELLANEOUS Buyer may not assign its rights or duties relative to this order without Seller’s written consent, but Seller may assign its interest in such order to any affiliate or successor in interest. The waiver of any breach of these TERMS AND CONDITIONS shall not constitute a waiver as to any further breach. Any of these TERMS AND CONDITIONS found to be invalid, illegal or unenforceable, shall be considered inoperative and the remaining TERMS AND CONDITIONS shall be valid and enforceable as though such provisions are not included herein.
