SHOR-PET

The Shor-Pet Grooming Table and All-Purpose Table Lead Line of High-Quality, Durable Products

In July 2021, Shor-Line introduced a line of professional animal care and grooming products that feature the durability that customers expect from Shor-Line. These no-frills tables build in key features that are critical to deliver a hard-working product.

Shor-Line launched these products in response to requests for high-quality basics on grooming and all-purpose tables. Our engineers kept customer favorite features while creating dependable products with basic features.

Shor-Pet Grooming Table

The **Shor-Pet Grooming Table** combines style with ergonomics so that customers can efficiently groom their pets. This table contains a textured polyurethane coated surface designed to prevent paws from slipping. Its attractive Silver Vein or White color complements most facility decors.

This product also features a hydraulic jack that pumps the table up to the preferred grooming height, in a range between 20”H and 41”H. Its rounded edges are designed to protect groomers’ hips from injury. This table is sold without a grooming arm, but you can add the optional Shor-Pet grooming arm.

*Shown here with optional Shor-Pet Grooming Arm.

How to Purchase

More information on the Shor-Pet products is available at www.shor-line.com/shor-pet.

Shor-Pet All-Purpose Table

The **Shor-Pet All-Purpose Table** is the ultimate go-to table for everything from drying pets after a bath to applying toenail polish. This table contains a textured polyurethane coated surface designed to prevent paws from slipping.

This table also features adjustable leveling legs that can create a stable surface, even on uneven stone floors. Its rounded table legs are stylish and easy to clean, and its rounded edges are designed to protect groomers from bumps and bruises.

It is available in Silver Vein or White color.

The Strength of Shor-Line Stainless Steel

The **Shor-Line Grooming Arm** is arguably the strongest arm in the industry. We craft it with 11-gauge Stainless Steel and use our superior manufacturing process to keep it strong.

The arm is made from the same durable Stainless Steel that keeps Shor-Line cages going for decades. With that strength, you can depend on it to secure your precious customers. When competitive arms fail, customers come to us for retrofits.

Many competitive tables will accept a Shor-Line retrofit grooming arm. Call (800.444.1579) or email our sales team at shor-line.com to discuss whether a Shor-Line arm can improve your table.

The Grooming Arm is the heart and soul of our table, and it will give you the strong assist you need for professional grooming. We also introduced a **Rear Grooming Arm** last year, so you can either retrofit an existing Shor-Line Grooming Table with it or buy a new table with the extra arm added to the order. Finally, the **Shor-Pet Grooming Arm** is an optional attachment for the newly released Shor-Pet Grooming table, giving it a strong, dependable arm.

GROOMING TABLES

Professional Grooming Tables that Blend Beauty and Ergonomics

We know grooming is hard work that groomers artists love. Shor-Line grooming tables showcase the design features groomers said the needed the most.

At Shor-Line, we understand groomers need the table to take on some of the grooming work. This is why ergonomics are so important. Letting the table do the lifting and pivoting will save wear and tear on you arms and lower back.

Both the **Elite Grooming Table** and the **Big Top™ Grooming Table** feature a pivoting grooming arm that moves 180 degrees around the end of the table, locking into one of five positions. The groomer chooses the best way to groom.

The arm locks into any position vertically from 22”H to 39”H. We know you sometimes get in a hurry, so there is a silicone ball at the end of the arm to protect flooring.

Protecting Groomers & Pets

We build in adjustments others don’t think about. Our table has rounded edges to protect groomers’ hips and the proprietary tabletop coating is textured enough to give pet paws secure footing, but it won’t scratch up a groomer.

Our popular electric lift is virtually silent, lifting the pet gently with a foot control on each side. And there are adjustable feet, so the table can be stable even on stone floors.

With all the moveable electric parts on the electric table, Shor-Line took the extra step of gaining CSA/UL listing for both tables. This is a process in which a regulatory body ensures your tables are produced to a high standard for consistency and safety.

Room to work

We know groomers have lots of equipment, so both tables have plenty of room for equipment and the pet. The Elite Grooming Table is 26”W x 42.44”L, and a few years ago we introduced the Big Top for customers needing even more space. Its tabletop is 26”W x 48”L.

Quality that will last

All this means your Shor-Line Grooming table purchase will be a business asset. Quality is job #1 at Shor-Line, and we want to help groomers build the business of their dreams...whether it is a mobile service or an independent business.

GROOMING ARM

ADDING A REAR GROOMING ARM

The **Rear Grooming Arm** joined our grooming family last year. It retrofits on either the Elite Grooming Table or the Big Top™ Grooming Table, or you can order the arm when you purchase a new table.

It features the same strong, 1”-square Stainless Steel arm you find on Shor-Line grooming tables. It is a fixed arm that attaches underneath the table for strength. It raises from 22”H to 39”H.

803.3221.00	Fits Elite Grooming Table	2 lbs.
803.3221.08	Fits Big Top™ Grooming Table	2 lbs.

GROOMING PRODUCTS

TUB TAILS: THREE OPTIONS FOR DOG BATHING

When you are ready to move to a durable bathing solution, Shor-Line tubs are your ticket. Three tubs offer Stainless Steel durability and stylish looks that also make disinfecting simple.

The Top Dog

The **Elite Grooming Tub** is the most popular option. It is a crafted beauty with Stainless Steel tube construction that withstands even the strongest dogs without a whimper. Premium features abound to make bathing easier.

The pull-out staircase lets you walk a dog in, saving your back. As you get the water started, you can gently slide the stairs back in. The included PVC-coated tub floors can rest at the bottom for larger dogs or on top for smaller dogs.

The moveable grate is just one example of how the Elite Grooming tub takes the work off your body. The sliding ring on the tie-out bar slides easily so you can adjust the dog as needed without having to contort your body.

The supply caddy in the back area makes it easy to store supplies. Everything is at an easy arm’s reach, which minimizes lower back jerking and bending. These ergonomic features will lessen the strain of bathing multiple dogs.

This comes in a Right Hand or Left Hand door model. It is one of the most durable tubs you will ever own.

The Classic Tub

We’ve continued to improve our original **Classic Grooming Tub**. It has the same durable features as the Elite Grooming Table but without the door and stairs. It features durable Stainless Steel and the two options for placing the tub floor—high or low.

The tub construction and Shor-Line Stainless Steel makes it the most durable tub in its class. It will serve you for many years and many large dogs! This comes in a Right Hand or Left Hand drain model.

A Tub for Small Animals

The perfect addition to a busy salon that baths lots of little dogs is the **Small Animal Bathing Tub**. It is a compact 30”W x 24”D, and the lip is 11”H. The top lip is 36”H, or counter height.

These ergonomic design choices save your lower back by allowing you to use your hands and arms, not your lower back when washing the dog.

Elite Grooming Tub
Left Hand Door, Right Hand Drain 904.0702.40 367 lbs.
Right Hand Door, Left Hand Drain 904.0702.41 367 lbs.

Classic Grooming Tub
Right Hand Drain 904.0702.34 367 lbs.
Left Hand Drain 904.0702.35 367 lbs.

Small Animal Bathing Tub
Small Animal Bathing Tub 904.0752.30 367 lbs.

Showers Deliver Easy Bathing

The **Elite Grooming Shower** has the same durability you expect from Shor-Line with 1”-square Stainless Steel tubing reinforcing the frame. If you grab onto this frame, it will be a sturdy support.

This spacious shower comes with two PVC coated floor grates and two sliding rings. This accommodates your largest dogs but easily adjusts for smaller dogs.

Elite Grooming Shower
Right Hand Drain 904.0702.32 367 lbs.
Left Hand Drain 904.0702.33 367 lbs.

Heat-Free Drying

Shor-Line’s patented heat-free drying method provides a fluffy, speedy drying time without risk of burns or dehydration. Our special fans at either end lift and circulate the air to gently remove loose hair and give a clean finish.

We offer three dryer cage configurations—single, double (two stacked) and triple (a dryer on the bottom with two plastic holding cages above).

Dryer Cage
Single Unit 926.4836.01 129 lbs.
Double Unit 926.2000.02 258 lbs.
Triple Unit 926.3000.03 205 lbs.

HEAVY-DUTY FAUCETS MAKE WORKING EASIER

Our aim is to be your one-stop shop to purchasing everything you need to get started enjoying our products immediately. About the only extras you will need are the plumbing equipment.

Wall Mount Faucets

Shor-Line offers two **Wall Mount Faucet** options that work with the range of Shor-Line tubs and showers. All have holes pre-drilled to accept faucets (8” centers for larger tubs and 4” for small tub) and have at least two placement options.

The most popular hose is the blue coil hose. It is a heavy-duty faucet with an ergonomic swing nozzle. The flexible, 108”L hose is lightweight and easy to control. It has a balanced grip for easy bathing.

The other option is same style heavy-duty faucet with a Stainless Steel hose. The Stainless Steel is more durable and stands up to more use, but some groomers find the extra hose weight tiring.

This hose is 104”L and has a swivel adapter arm that helps easily reach in several directions. The high-flow valve is ideal for washing pets.

Wall Mount Faucet
Coil Hose 804.0139.00 8 lbs.
Stainless Steel Hose 804.0006.82 12 lbs.

CAGES

Legendary Shor-Line Cages Make Ideal Holding Cages

Every groomer needs a secure area to contain pets between drop off and pickup. Shor-Line cages have been what veterinarians trust for almost 70 years, so they can give groomers peace of mind as well.

Shor-Line cages come in a wide range of sizes and bank style, offering the perfect solution for any facility size. Premium features such as secure latch you can open with an elbow, patented hinges that keep the door opening and closing and rounded corners for easy clean up top the list.

PVC Coated Floors or grills are good additions for helping pets stay clean and dry as they wait for pickup.

Support for Groomers

Shor-Line has stood in support of groomers for decades. Many of the grooming products were designed with input from groomers and grooming thought leaders.

There is a special grooming section (<https://shor-line.com/professions/grooming/>) with special information just for groomers. Our blog also includes ideas and information to help grow and expand your business.

Our helpful sales team is happy to help with any remodeling or expansion you need as well as help make our long-lasting products last even longer. Our tech support team also has lots of free information for troubleshooting long after the warranty has expired. We support our products.
